

# The all new **ATTO<sup>3</sup>**

**Spectroscopy from Lab to Pocket**

**Compact, cost-effective and research level performance in your palm – developed by spectroscopy experts, for the everyday user...**

## Key Features

- Ultra-compact, ergonomic and robust
- Wide Band: 380 to 1,020 nm
- Repeatability customizable to 0.1 nm
- 2 to 20 nm configurable resolution
- 50 measurements per second
- High SNR and Dynamic Range
- Software for Windows, Mac Platforms
- USB Powered, USB 3.0 interface

## Technical Specs

Wavelength Range	380 nm – 1,020 nm
Peak Repeatability	< 1 nm*
Size / Dimensions	32 x 32 x 66 mm <sup>3</sup>
Weight	75g
FWHM	12 nm (customisable to 2 nm)
SNR	> 1000:1
Dynamic Range	12 bit
Integration Time	10 us to 1 s
Numerical Aperture	0.3*
Measurement Speed	50 frames per sec*
LED*	White High CRI LED, UV LED
Supply Voltage	5 V, USB based connection
Power Consumption	0.4 W (CMOS) 0.1 to 1 W (LEDs)*
Operation Temperature	-30°C to +70°C
* based on configuration, customisable	

**We bring spectrometers from laboratories to the wider community disrupting the world of spectroscopy.**
